Executive summary

I am a passionate and adaptable professional with expertise in Java, Python, and JavaScript, combined with a solid understanding of business processes. I use my technical skills to create efficient software solutions that align with business goals and user needs. With a strong ability to bridge the gap between development and business strategy, I aim to deliver innovative solutions that drive value and improve user experiences.

Experience

Hackup Technology, Coimbatore — Intern

Aug 2024 - Sep 2024

Tools: Kali linux, Wireshark, Metasploit

I gained hands-on experience in conducting vulnerability assessments, penetration testing, and threat analysis. I used tools like Nmap, Metasploit, and Wireshark to identify security weaknesses and support incident response efforts. I'm eager to apply my knowledge and contribute to strengthening cybersecurity defenses in future roles.

PROJECTS

Student Management(CRUD)— Build using Python and SQL

Developed a Student Management System using Python and SQL to streamline student record management. The system allows for efficient data storage, retrieval, and modification of student details such as personal information, courses, grades, and attendance. Utilized Python for backend logic and SQL for database management, ensuring data integrity and smooth user interactions.

EDUCATION

Dr.N.G.P. Institute of Technology, Coimbatore — B.Tech 2022- 2026

A dedicated B.Tech student in Computer science and Business Systems from Dr.N.G.P. Institute of technology , with a CGPA of 7.5+. Proficient in core subjects like programming in c, java and Business analytics and experienced in projects like Student management system.
