Full Stack Developer | JAVA | C | HTML | CSS | JavaScript | TypeScript | React.js | Node.js | Express.js | MongoDB | MySQL | GIT | AWS

Passionate Full Stack Developer with hands-on experience in building responsive web applications using React.js, Node.js, and MongoDB. Proficient in solving real-world problems through efficient algorithms and clean code. Actively seeking opportunities to leverage my skills in scalable application development.

Education

 **Sri Shakthi Institute of Engineering and Technology**

B. Tech, Information Technology

Oct 2022 - May 2026

CGPA *: 7.70

Skills

- ➊ **Programming Languages:** Java, JavaScript (ES6), C, TypeScript, HTML, CSS, Embedded C
- ➋ **Libraries & Frameworks:** React.js, Node.js, Express.js, Redux Toolkit, Tailwind CSS.
- ➌ **Tools & Platforms:** Git, GitHub, AWS, Postman, Netlify, Vercel, Microsoft Teams, Figma.
- ➍ **Problem Solving:** Analytical thinker with a strong problem-solving mindset.
(Solved 500+ problems across LeetCode and CodeChef)

Projects

Sync Together (PRODUCT)

 (React js, Express js, Node js, MongoDB)

Sync Together is an innovative web application that provides a real-time virtual room for users to enjoy music and watch YouTube videos together. Designed to enhance social interaction, this platform offers synchronized playback and real-time messaging, creating a collaborative and engaging experience for users worldwide.

Alumnis-Hub (PRODUCT)

 (React js, Express js, Node js, MongoDB)

The Alumnis-Hub is a dynamic platform designed to connect junior and senior students of a college. Built using the MERN stack (MongoDB, Express.js, React.js, Node.js), the application provides a collaborative space for students to share their profiles, interact, and build meaningful connections. The platform features email OTP verification for account security and robust messaging functionalities to facilitate seamless communication.

Blood Community (PRODUCT)

 (React js, Express js, Node js, MongoDB)

Blood Community (A Full Stack Solution for Life-saving Connections 🌟) is a platform I designed and developed from scratch using the MERN stack. This community-focused platform enables users to easily find blood donors and fosters a supportive network for those in critical need.

Travel- Itinerary Planner

 (React js, Express js, Node js, MongoDB)

The Travel Itinerary Planner integrates multiple APIs, such as Google Maps API 🗺️, Weather API ☀️, Air Quality API 🌬️, and Currency Converter API 💱, to deliver real-time data for the places entered into the application. The admin dynamically manages all data, ensuring a seamless and user-friendly experience..

Licenses & Certifications

 **Full Stack Web Development (MERN Stack)** 🎓 –unstop

 **Java** 🎓 – unstop

 **JavaScript (Es6)** 🎓 – unstop

 **React.Js** 🎓 – unstop

 **Git** 🎓 – unstop

 **AWS** 🎓 – unstop

Achievements

- Solved 500+ problems across LeetCode and CodeChef
- Developed 20+ Java console projects
- Built 10+ full-stack projects
- Created a fully functional seat booking software in 50 minutes with 325 lines of Java code
 - 🇮🇳 Ticket booking
 - 🗺️ Seat reservation and visualization
 - 📄 Detailed bill generation

Ranked below 3L globally on LeetCode, out of 80L+ students and professionals

- GitHub streaks holder
